Energy Efficient Features

of a Yankee Barn Homes Shell Package

Yankee Barn Homes True Panel System affords significant reduction in energy used for heating and cooling

True Wall and True Roof™ panels, starting with R-values of 28 and 59 respectively, combine to create a tight build envelope

Pre-installed Polyisocyanurate insulation offers the highest R-values per square inch of thickness to create an efficient home

All package components are constructed in-house in a climate-controlled environment producing less materials waste

Pre-installed ZIP System® sheathing for superior air protection, with options to upgrade to ZIP System® insulated R-Sheathing

True Roof™ System is PFS-TECO certified and uses a panel joint design to impeded air infiltration

Pre-installed Low E or better windows in our True Wall panels using flashing, insulated headers, and Zip System® sheathing
