Yankee Barn Homes

Shell Package Components

Services Included

The following design-build services are included with the Yankee Barn Homes (YBH) structural shell package:

- Development of architectural design, schematic and progress plans sets for the home layout by our in-house designers
- Engineering review of the YBH shell package
- Construction plans for the YBH shell package, including a foundation plan
- YBH Construction Supervisor works on-site with a General Contractor to assemble the YBH shell package

THE PRICE for an individual shell package depends on design criteria, such as the size and shape of the home, the geometry of the timber frame, and window specifications.

THE CLIENT'S BUILDER is to provide labor and necessary equipment to assemble the YBH shell package. The client's builder also provides materials and labor to finish the interior. This generally includes the site work, foundation, first floor sub-floor, roofing material, drywall for the interior, wall partitions, electrical wiring, plumbing, heating & cooling, kitchen and baths.

ADDITIONAL PRODUCTS and services include:

- Additional polyisocyanurate insulation for True Wall and True Roof™ Panels
- Cupolas, open or closed to the interior
- Engineered stamped plans
- YBH Construction Crew to assemble the home shell package
- First floor deck material with Advantech® sub-floor
- And more - ask your Customer Sales Representative for details
